Fiscal Court Meets.

The Powell Fiscal Court met Tuesday in regular session with all members of the Court present. It will be remembered that new Magistrates have been commissioned by Governor Willson in the two new Magisterial districts recently formed. They are: T. B. McCall and Green Speerlock.

The claims allowed have been curtailed at least 25% over that of former courts. This has become absolutely necessary in order to meet the payment of the bridges recently built in the county.

The court with Magistrate W. T. Adams violently dissenting passed an order to aid Clay City in building a bridge across Red river near where the old pontoon bridge was located and to assist in building a bridge at the Hammons ford. They refused any aid at this time to the ford near the old forge site in this city. Judge Hardwick and J. E. Burgher were appointed a committee to see the different bridge companies and get an estimate of the cost of the two first named bridges and to locate the site for the one at Hammons ford and confer with the Clay City officials in the location of the one in Clay City.

The Times would like to have seen both the remaining fords out of Clay City bridged, but if cannot get the two we would be glad to get one of them spanned with steel.

The Present and Future.

As Prof. Lane says, "We are Soil Robbers" in America—especially in the South.

Like grasshoppers, we eat all we can when food is plentiful and starve in winter.

The ant stores food for winter while it is plentiful in summer and thus "lives at home."

Any method of farming that destroys instead of building up the fertility of our land is waste. It means living for the present (like grasshoppers) and not for future (like ants) and while we ourselves may live, our posterity will suffer. It amounts to selling the fertility of our soils to make good for the present and handing down poverty to our children.

Says Hoard's dairyman: "The trouble with the American farmer is that they 'dislike to sacrifice something now in order to gain something hereafter.' But that is a true test of a good farmer. When he is willing to lend a certain amount of money every year to the farm to keep up its fertility; when he refuses to engage in any kind of farming that will weaken that fertility; when he will plow under a fine crop of clover in the fall, with 1,000 pounds of rock phosphate spread upon it, just to build up the supply of humus and future productive power; when he will buy ground limestone and a machine to spread it; when he will spend money enough to buy a first-class dairy bred sire to build up the productive energies of his future here; when he will spend a little money on better stables, to build a silo and some other things, then he is facing the right way. Then he is working for the future and not for the present, and when the future shall become the present, then will he find his

justification. Then will he prove that he is a true farmer. What a hopeless thing it is, to live only for the present and not for a better future. And what a curse that kind of farming has proved to the United States and the enlargement of the knowledge of the American farmer."

Herein lies the secret of success for our Southern farmers. The question of building up and maintaining the fertility of our soils is greater than the prohibition question, greater than the tariff question, greater than all else in the world.

When our farms are brought to a state of fertility and we have something except wornout, gullied fields for our boys and girls to look upon and call "home" then will the cities cease to grow and our rural districts will improve. Then will the cry of "back to the farm" be changed to "the cities are in need of brain and brawn" and millions of parasites will be compelled to work for a living.

But, will the farmers lead?—Southern Farm Advocate.

Our New Rate.

The opportunity is past and the last subscription to the Times at 50 cents per year has been received. The price now is \$1.00 per year. Many came forward and renewed at the old rate, though a great many more failed to do so. We intended to improve the paper before raising to \$1.00 per year, but our plans failed and we didn't get to do this, consequently we are going to do the next best thing possible, accept individual subscription until the enlargement is made at 75 cents per year when paid in advance, two years for \$1.40 or three years for \$2.00. We trust many will take advantage of this rate while it lasts as after the paper is enlarged the rate will be \$1.00 per year without any deviation and this will be done within the next two or three weeks.

Remembers Kentucky Friends.

Gabe Hays, of Weir, Texas, remembered Mesdames Jennie Russell, Anne French, J. M. Kennon, J. W. Williams and John Carr with some Texas honey sent them to prove what the Panhandle will produce. His Kentucky friends who were the recipients of the fruit of his apiary are more than thankful for his pleasant donation and all join in wishing "Uncle" Gabriel a successful and pleasant life in the Southwest.

Byrd at Sandy Hook.

At an early hour Monday the streets of Sandy Hook were filled with throngs of the hardy, honest sons of Elliott county, all anxiously awaiting the arrival of Hon. A. F. Byrd, who is to lead them to a glorious Democratic victory in November.

At a few minutes until two o'clock, soon after his arrival at the court house yard, he began his masterful address. His large and enthusiastic audience was well repaid for their long wait; for one hour and forty five minutes he held the assembly spell-bound by his eloquence, such as is rarely heard in Sandy Hook, and which far surpasses that of his arrogant opponent, John W. Langley. (I beg your pardon, Mr. Byrd, for using his name in the same sentence with yours.)

From the beginning to the end of this oration, Langley was pierced by the pointed darts of irony which were cast with unerring aim and precision by his merciless tormentor. This frequently brought storms of applause from his auditors, who greatly enjoyed watching the different colors which rapidly chased each other over the face of the enraged Langley as he set quivering, like a whipped cur at his master's feet.

Bit by bit, Langley's mask was torn to shreds, and he stood revealed to his too often deceived constituents as an object of ridicule to be spurned by all lovers of honesty.

After listening with pleasure to this flood of eloquence, the audience, more sorrowful than angry, gave the notorious stand-patter a chance to vindicate himself and repudiate the serious, but true, charges made by Mr. Byrd. This he attempted by heaping vituperation and opprobrium upon Mr Byrd, who, stood calmly by listening to the peacock vainly trying to recover lost ground. But the Langley, who is usually so hilarious, was glad to seek seclusion when he found that he was unable to make his hearers see the point. It is safe to say the intelligent voters of Elliott county will have no more of this traitorous tool of Cannon and Aldrich.

Senator Bradley is out speaking for Langley. He was over at Pikeville Tuesday. Byrd was there too and asked a division of time with Bradley. This Bradley refused to give. Byrd spoke there the next day and tore things all to peices for the Republicans. While Langley carried Pike two years ago by 1,400 votes it is claimed the county will go for Byrd this time. Byrd has the facts to back his argument.

Governor Willson and his secretary, Capt. Jackson Morris will tour the Tenth district and speak for Langley in an effort to save the district, which they realize must go Democratic if something is not done. The Governor announces that he will carry requisition blanks and blank pardons along with him.

Mr. and Mrs. H. H. Hoskins visited relatives near L. & E. junction Saturday and Sunday.

Senator Bradley been here speaking for Langley. Governor Willson coming. O, my, but aren't they getting scared over "Promissory" John's outlook. Cheer up Democrats, there are harder times ahead for them. All you need to do is to go to the polls in November and stamp under the rooster, that'll fix 'em good and fast.

When the first fight between, what is known as the Insurgent wing of the Republican party, broke out in opposition against speaker Cannon and his stand-patters, speaker Cannon and Senator Aldrich, who dominate the House and Senate respectively, succeeded in controlling President Taft to the extent of having every item of patronage cut off from the insurgent Republicans.

No Insurgent Senator, of which there were eleven, and no insurgent Representative, of which there were about forty-five, could secure the appointment to a crossroads postmaster.

During the last few months the people have had a say in this matter. They have had a shot at Senator Burrows, of Michigan and Senator Hale of Missouri, who were two notorious standpat Republicans and bitter enemies of the Insurgents. The voters have blown these luminaries into atoms.

Now after Mr. Taft cut off patronage from the Insurgents for more than a year, he comes out in a letter through his secretary and announces that thereafter Insurgents shall have all of the pie that can be found and that no discrimination will hereafter be made against them.

Mr. Taft is very much like a certain French orator who was addressing a mob which suddenly ran away from him. Whereupon the French orator says, "When they run away, I must follow them, for I am their leader."

That New York College that has started a department of journalism might conserve its energy. Everybody knows how to run a newspaper.

Two years ago the National Republican platform declared for a revision of the tariff downward but they raised it upward. In the Tenth district, Langley promised us turnpikes but he has failed to deliver the goods. Both are highly in accord with Republicanism and should be commended for their loyalty to their bosses, the trusts.

Langley denies promising turnpikes for Elliott county; perhaps he'll forget he laid the corner stone for one recently, and deny that too.—Elliott County Democrat.

He had better not deny promising them to Powell or rather the whole district with preference to the mountain portion.

An amateur man-bird hitched up a biplane, sailed over to the home of a friend, collided with a telegraph pole and dropped in to the front yard with a dislocated shoulder and some internal injuries. These aviators much think their friends have no nerves at all.

Colonel Roosevelt says 1912 isn't bothering him. It oughtn't to. Any man who has hunted wild game ought not to be bothered by a little thing like the nomination.

Poor old Doc. Cook simply will not "come back". It is just a year ago he discovered the pole and about six months since it lost him.

Byrd will support his party's platform, but what has Langley done, and what he has done in the past he will do again.

The one thing that commends travel by airship is that you are in no danger of being run down by an automobile.

If every voter tries to follow Mr. Roosevelt's advice in November the split ticket is sure to prevail.

Secretary Norton's letter reminds a great many of a drowning administration grabbing at a straw.

President Taft's effort to pose as the candy man for the Insurgents doesn't give much promise.

"I look for a Democratic Congress," says one Republican. Look a little longer and you will see it.

And nobody has forgotten that Taft had the T. R. stamp of approval all over him in 1908.

The Republican politicians really need a few doses of, soothing syrup.

Remedies are Needed

Were we perfect, which we are not, medicines would not often be needed. But since our systems have become weakened, impaired and broken down through indiscretions which have gone on from the early ages, through countless generations, remedies are needed to aid Nature in correcting our inherited and otherwise acquired weaknesses. To reach the seat of stomach weakness and consequent digestive troubles, there is nothing so good as Dr. Pierce's Golden Medical Discovery, a glyceric compound, extracted from native medicinal roots—sold for over forty years with great satisfaction to all users. For Weak Stomach, Biliousness, Liver Complaint, Pain in the Stomach after eating, Heartburn, Bad Breath, Belching of food, Chronic Diarrhea and other intestinal Derangements, the "Discovery" is a time-proven and most efficient remedy.

The genuine has on its
outside wrapper the

A Clear-Cut Explanation of Why Prices Have Increased.

When the Payne-Aldrich bill was before the Senate, blind Senator Tom P. Gore of Oklahoma staked his reputation that if the measure was passed extreme high prices would follow.

The prophecy was fulfilled. Average prices rose more than 17 per cent. from June to December, 1909. The prices of steel trust common stock more than doubled in six months in 1909.

It is the history of all protectionist countries that tariff revision upward means increased prices. It is not generally realized how rapidly the price of tariff-protected articles rose after the passage of the Dingley law in 1897. From July 1, 1897, to January 1, 1900, the first three years following the Dingley law, the cost of living advanced 31 per cent. or at the rate of 9 per cent. a year. More trusts were formed during this than during any other similar period in our history.

The price of wire nails rose from \$1.36 a keg, in August, 1898, to \$3.53, in December, 1899—160 per cent. in 16 months.

The price of barbed wire rose from \$1.65 per 100 pounds, in August, 1897, to \$4.13, in December, 1899—150 per cent. in two years.

The price of window glass rose from \$1.75 a box, in April, 1897,

to \$4.80, in 1901—175 per cent. in four years.

The Dingley tariff made the trusts, and the trusts put up the prices. But few, if any, trusts were formed during the three years of the comparatively low duties of the Wilson bill.

When the German government introduced its tariff law of 1902, it published an explanation which contained the frank statement that "inland prices are raised, so far as a consideration of the circumstances of the last ten years will allow us to judge, in proportion to the duties."

In France, Italy, and some other European countries a part of the municipal revenue is raised by duties on goods entering the town. At the gates of such towns there is an official who collects this tax, and it is found that the difference in prices of articles purchased outside of the towns and within the towns is in nearly every instance exactly the amount of the duty. The same happens in trade between nations.

The reason the sugar trust, the steel trust, the lumber trust and the harvester trust are willing to contribute large sums to the campaign funds of President Taft and Republican candidates for Congress and are unwilling to contribute to the funds of Democratic candidates, is that the Republican party is the party of excessive protection. Tariff revision upward means increased prices, and the tariff trusts know that they can collect from the people in new profits whatever sums they may invest in the Republican campaign funds.

The Republicans promise to make public the source of their campaign contributions—after the November congressional election.

The report of the standpat Republican members of the Ballinger investigating committee is to make public—after the election.

Nothing further is to be said of the Taft-Humphrey ship subsidy bill—until after the election.

The soft pedal is to be applied to the Oklahoma Indian lands theivery—until after the November election.

Nothing is to be done with the Lorimer investigation—until after the election.

No step is to be taken in the sugar trust-friar lands Philippine scandal—until after the November election.

And, last but not least from the standpoint of relative importance, the National Monetary commission, of which Senator Aldrich is chairman, will not make its report recommending a central government bank—until after the November election!

The national Republican platform of 1892 contained the following paragraph:

"We denounce the efforts of the Democratic majority of the House of Representatives to destroy our tariff laws piecemeal, as manifested by their attacks upon wool, lead, and lead ores."

Times have changed. Republican candidates for Congress, upon the advice of President Taft, are now advocating and promising tariff revision "piecemeal" with the intimation that the schedules enumerated will be the first ones tackled. In other words, the Republicans have adopted another Democratic idea.

Thirty-five per cent is the amount of profit Armour & Co., forced the public to pay last year. This became known through a statement submitted by Armour & Co., in connection with the listing of a bond issue of \$30,000,000 on the stock exchange. The company by its own showing made a gross profit of \$10,582,000 for the year 1909 on a capital stock of \$20,000,000 and earned a surplus of \$7,127,926, or the equivalent of a dividend of 35.6 per cent. As the price of beef was boosted with the beginning of 1910 it would appear that in the opinion of Armour & Co., a 35.6 per cent. profit on capital stock is not ample, even though the commodity involved in one of the necessities of life. Armour & Co., is one of the beef trust firms which enjoyed perfect immunity from prosecution by the Federal government until Federal Judge Landis of Chicago, an insurgent, forced the Taft administration to take cognizance of the fact that the beef trust was illegally holding up the public.

Twelve hundred and fifty banks in various parts of the United

States already have made application to the postoffice department to be designated depositories for postal savings funds, and 648 postmasters have made requests for the establishment of postal savings banks in their offices. About 80 per cent. of the applicants will be disappointed. The government intends to start but one or two postal banks in each state for the present. Some day, perhaps, possibly when a central government bank which can be manipulated by Wall street comes into existence, the postal bank system may be extended.

NEW IDEA MANURE SPREADER FARMERS, ATTENTION!

This Manure Spreader is different from all others. Do not buy without first investigating the merits of the same. The exclusive features not found on other machines: Drawn with coupling pole; without a clutch or cog wheel. Can be heaped in loading, the same as a farm wagon. Guaranteed to pulverize all manure (notice the three chances). This machine is built on a common sense principle of a farm wagon, hence is the simplest most durable, lightest draft, lowest down (hence easy to load into) spreader on the market! Backed by ten years' experience, not an experiment. Ask for catalogue X.

Succeed when everything else fails. In nervous prostration and female weaknesses they are the supreme remedy, as thousands have testified.

FOR KIDNEY, LIVER AND STOMACH TROUBLE

it is the best medicine ever sold over a druggist's counter.

Smothering Spells

"I suffered for nine or ten years. Had spells of smothering, finally went into convulsions. Dr. Miles' Nerveine brought complete relief, and I believe saved my life."

MRS. ROSA BONNER,

185 N. 18th St., Birmingham, Ala.

The blood is the channel through which is transported the nourishment that sustains life. When the circulation is poor, your vitality is low, your nervous system exhausted and you are weak and debilitated. You can restore nervous energy by taking

Dr. Miles' Nerveine. Its strengthening influence upon the nervous system gives it power to send life-giving blood through the veins. The first bottle will benefit; if not, the druggist will return your money.
